Silent Partner™ Sound Attenuated Enclosure

As an MWI Pump Partner, we are proud to offer the Silent Partner™ sound attenuation enclosure.

These units are great for wherever quiet operations are needed, like residential areas, hospitals, government buildings, or schools. The design is optimized for pumps that run hard in difficult environments.

Silent Partners are quiet, run cool, provide easy access to all compo-

nents, and are heavy duty. All MWI equipment have been designed for the toughest applications and are maintained by our trained technicians. Let us help you make your next project a success!

Features

- Quiet as a business office—68 dB @ 7m away - operating at full rated capacity (based on CPB standards).
- Heavy-duty steel enclosure with sound-absorbing insulation, engine vibration isolators and critical grade muffler for quiet, trouble free operation
- Quick and easy access to all critical components with multiple large access panels via removable doors
- Doors open to the side to avoid head injuries and the problems of limp struts that won't hold the panels open.
- Lifting Bail
- Lockable doors to prevent vandalism
- Bolt together modular construction - easily remove or add: lifting bail, tow bar, axle and bumper to go from skid to portable or vice versa
- External engine oil drain to facilitate oil changes
- Available in skid or DOT highway trailer
- Radiator access port for external topping off
- Entire enclosure unbolts to provide complete access to the pump, engine and all components
- Exhaust in secondary enclosure to reduce temperature and keep the inside clean
