## **Water Management Solutions: Equipment Rentals and Sales**

Providing quality temporary water management equipment:

### **Centrifugal Trash Pumps and Sound Attenuated Pumps**

A versatile self-priming, dry running all purpose pump ideal for sewer bypass pumping and general construction dewatering. Available in sizes from 4” to 12” with or without sound attenuation.

### **Rotoflow™ Rotary Well point dewatering and sludge pump**

Well point dewatering pump that moves large volumes of air and water.

### **Duroflow™ hydraulic submersible**

Ideal for high lift applications and tough locations. Great for dewatering and sewage pump stations with high solids.

### **Hydra flow**

Proven pump for high flow, low head applications. Efficiently moves huge volumes of water. Available in sizes from 12” to 30”!

### **Potable and Non-Potable Storage Tanks**

21,000 gallon Frac tanks for your potable water, non-potable or other liquid storage needs. Large storage capacities for emergency holding, water filtration

Provides quality water filtration and treatment options including:

Temporary sedimentation bins

Temporary sediment filtration systems

Temporary carbon filtration systems

Temporary ph adjustment and chemical feed systems

**Solutions, Inc.**  
**844-664-8845**

Equipment is only as good as the service that stands behind it, that's why WMS maintains a local staff of factory trained technicians on call **24/7/365** to handle any emergency. Our trained staff can assist you with regular maintenance, installation, and setup of your temporary water management system. Ask your representative about our ***premium care service plan***, and our ***no worries maintenance plan***.
